PRO-CLEAN Rapid Protein Food Residue Test *from* Nelson-Jameson

The Pro-Clean Rapid Protein Residue Test quickly detects buildup of protein residue on food contact surfaces before equipment startup. Clumps and pockets of protein material can bleed into the next batch of product creating an allergen problem. Results are semi-quantitative, revealing surfaces which have been missed during the cleaning process. Performance tested using soils containing protein from milk, eggs, shellfish and fish. Pro-Clean is not intended to be a substitute for food product allergen tests.

No instrumentation is required. Simply swab a surface, release the reagent and if protein residue is present the reagent will turn purple within 10 minutes. The more contamination present, the quicker the color change and the darker the color.

332-3230 Pro-Clean Protein Residue Swab, 100/box

Associated Items:

446-3340 Swab Rack, 50 Swab Capacity
607-3004 3-Channel Digital Timer/Stopwatch/Clock, 2.75"W x 2.5" H,
includes 1-AAA Battery

Now serving you from three locations:

**Marshfield, Wisconsin
Turlock, California
Twin Falls, Idaho**
